

Applied Science Summer Assignment

The assignment should take no longer than **4 hours** to complete. Your summer assignment for each course must be submitted in the **relevant first lesson in September**. Please note that failure to do so will automatically place you on your **first warning** during the induction period. Your grade will be reported home in September.

Task

You are creating an information leaflet for a GP surgery. Your task is to conduct research and create an information leaflet outlining the differences between communicable and non-communicable diseases.

- Give a detailed example of each disease type.
- Remember to include pictures/diagrams and check your spelling, grammar and punctuation.

Allocated time: 4 hours.

Assessment criteria

Level	Criteria
Pass	I can explain the difference between communicable and non communicable diseases and give an example of each, outlining the characteristics, actions and associated risk factors.
Merit	I can describe the cause of the disease and explain how the disease affects body systems to cause symptoms.
Distinction	I can evaluate the effectiveness of current treatment methods and explain how they work to eradicate or control the disease.

How to make a leaflet using Word

- Open a Word document. ...
- On the upper left, click the "File" menu.
- In the left vertical column, click the "New" tab.
- Select "Brochures and booklets" from the available templates.
- Select "Brochures" from the available templates.
- Choose the kind of brochure you wish to use.
